EXPERIENCE

Ando-JP   **Mar 2025 - Current**
Full Stack Developer (Contract)

Skiwiks - Job Portal
- Built a multilingual job portal with role-based dashboards using Firebase for authentication and Supabase for database and real-time data.
- Implemented advanced job search filters, resume uploads, and application tracking.
- Enhanced user experience with responsive design and optimized performance.

Kabe Share - Art Marketplace
- Built a React.js + Redux platform for showcasing and selling wall art, with 50+ daily users and a custom CMS for sellers.
- Integrated a point-based comment system and gamified features, increasing engagement by 45%.
- Implemented an interactive comment system with point-based rewards (1 point per comment, bonus points for correct artwork name guesses).
- Designed responsive UI components ensuring seamless experience across devices.

Sky Lens Studios   **Nov 2024 - Feb 2025**
Web Developer (Contract)

- Developed and launched a professional website for Skylens Studios, a photography studio, to enhance their online portfolio.
- Designed an engaging landing page to captivate visitors and drive inquiries.
- Implemented a dynamic gallery section to showcase their photography work effectively.

Ganesh Woven Polypack   **June 2024 - Sep 2024**
Web Developer (Contract)

- Developed and deployed a responsive website for Ganesh Woven Polypack, enhancing their online presence.
- Implemented a product gallery section to showcase machinery without affecting other website elements.
- Managed hosting and deployment, ensuring smooth operation and uptime.
- Designed and integrated a contact form, enabling potential clients to easily reach out, leading to increased inquiries and business opportunities.

Sabertooth Technlogies   **Feb 2023 - Apr 2024**
Software Engineer

- Assisted in setting up AWS S3 for static file hosting, improving content delivery speed.
- Configured CI/CD pipelines for automated deployments.
- Developed and optimized web3 components for Crypto Jhinga using React.js, enhancing UI/UX and boosting user engagement.
- Integrated payment functionality and implemented Chart.js for daily crypto graphs, increasing data interaction by 25%.
- Launched The Culminator job portal, improving UI/UX and increasing user engagement by 20%.
- Led the development of Lantern Sharks e-commerce store, customizing components to increase sales by 20%.
- Integrated RazorPay and tested for seamless payment processing.
