EXPERIENCE

Kabe Share   **Mar 2025 - Current**
Fullstack Developer (Contract)

- Developed a modern web platform using React.js and Redux for a wall art marketplace with 50+ daily active users.
- Built a custom CMS enabling sellers to manage their art portfolios, resulting in 30% increase in content uploads.
- Implemented an interactive comment system with point-based rewards (1 points per comment, bonus points for correct artwork name guesses).
- Designed a gamification system where users earn rewards for engagement, leading to 45% increase in user interactions.
- Created reusable component library and implemented responsive design, ensuring seamless experience across all devices.

Sky Lens Studios   **Nov 2024 - Feb 2025**
Frontend Developer (Contract)

- Developed a responsive photography portfolio website using React.js, enabling seamless viewing and sharing of work.
- Implemented image optimization and lazy loading for fast load times and improved SEO performance.
- Created an intuitive admin dashboard for content management and analytics tracking.

Ganesh Woven Polypack   **June 2024 - Sep 2024**
React Native Developer (Contract)

- Developed and deployed a mobile app for Ganesh Woven Polypack to showcase products and receive client inquiries.
- Implemented a product gallery and contact form with real-time notifications using Firebase Cloud Messaging.
- Managed app deployment to Google Play Store and Apple App Store.

Sabertooth Technologies   **Feb 2023 - Apr 2024**
Software Engineer

- Developed and maintained React Native and React.js components for Crypto Jhinga, improving mobile and web user experience.
- Integrated REST APIs and WebSockets for real-time data in mobile apps.
- Configured CI/CD pipelines for automated mobile app builds and deployments.
- Implemented payment functionality and interactive charts in mobile apps using third-party libraries.
- Collaborated with cross-functional teams to deliver high-quality mobile and web products.

PROJECTS

Food-Store   ⬈
| *React Native, JavaScript, Firebase*

- Developed a cross-platform food ordering mobile app using React Native and Firebase for real-time order management.
- Implemented push notifications and offline support for seamless user experience.

Netflix-Clone   ⬈
| *React Native, Node.js, TMDB API*

- Built a Netflix-like mobile app with React Native, featuring authentication, content streaming, and TMDB API integration.
- Focused on smooth navigation, optimized performance, and responsive design for mobile devices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
